## Datacentre Solutions with Kick ICT

### About Kick

Kick ICT Group are one of the UK's leading independent ICT services businesses, with a talented and highly skilled team that provide outstanding service and value to our clients. Our four divisions, Technical, Dynamics, Infor and Communications allow us to deliver tailored expertise to each client.

Founded in 2015, we've grown rapidly with **nine** acquisitions, combining over **40 years** of expertise and service from respected industry players Castle and Talon.

We pride ourselves on our commitment to providing outstanding IT solutions, services and support. Yet we believe that it's how we work with people that is most important to us.

**You can trust in our expertise. We're here to help.**

## Introducing our datacentre

Whatever the size of your organisation, the way in which you organise your IT infrastructure, data and key applications is fundamental to the ongoing security and success of your business.

This can be a complex and daunting challenge but, with the right datacentre solution, it's a challenge that can be overcome.

The purpose of the datacentre is to provide a highly secure and remote facility that houses IT infrastructures for organisations of all shapes and sizes. This could be as straightforward as an offsite space to house a single stack of customer equipment to a wide ranging and complex physical, exterior data space hosting key customer data and essential business applications, or even a privately owned 'in house' facility.

At Kick we can cater for each of these instances, working with customers on an individual basis to understand their challenges when it comes to data and system storage requirements and ensuring we deliver them the most suitable datacentre solution.

Furthermore, we invested significantly in 2019 to modernise our datacentre to provide customers with access to the very latest in datacentre technologies. As a Kick customer you'll receive the peace of mind that comes from hosting your equipment, applications and data in our state-of-the-art, fully managed Nutanix hyper converged infrastructure hosting environment, with all the security, accessibility and cost benefits this brings.

## What to expect from our datacentre

Gain access to a state-of-the-art datacentre environment with all the operational and peace of mind benefits this brings. Here's what you can expect when partnering with Kick ICT for your datacentre requirements:

<p><b>Maximum uptime</b></p> <p>We provide our customers with a 99.982% uptime guarantee (Tier 3) to ensure your systems and applications are there when you need them</p>	<p><b>Maximum security</b></p> <p>With access to a highly secure ISO27001 accredited environment</p>	<p><b>Remote working ready</b></p> <p>Strengthen your resilience to meet the demand of the ongoing upsurge in remote working</p>
<p><b>Flexible hosting solutions</b></p> <p>You can choose between a private, hybrid or multi cloud environment to host key applications and manage data requirements</p>	<p><b>Outstanding support</b></p> <p>Proactive, remote monitoring of your datacentre environment, highly experienced support team with the option to include a 24/7 x 365 support plan</p>	<p><b>Exceptional data back-up</b></p> <p>Take comfort that no matter what happens you can be confident your data is safe, secured and backed up via multiple copies</p>

## Pricing plan

Our datacentre pricing is based on two key elements; a clear and simple cost per user based on your storage requirements, and an associated deployment cost to take your organisation into our datacentre.

User cost: £45 - £125 per user per month (dependent on storage requirements)  
Project consultancy/management/deployment: £695 - £895 per day

All costs are exclusive of VAT and can differ from above dependant on individual customer requirement. fully scoped and agreed with the customer pre deployment.
